# Company Profile

## Positioned to be the world's premier provider of integrated water-sports equipment solutions.

Dongguan Tianhe Technology Co., Ltd. was founded in the core area of the Pearl River Delta manufacturing industry, focusing on research and development innovation and precision manufacturing of water and outdoor sports equipment. We provide one-stop OEM/ODM solutions from product research and development design to mass production and delivery for global customers. We have a 618 square meter dedicated office, a 15000 square meter modern production base, and 20+core technology patents. We are an industrial company that integrates research and development, production, sales, and service, committed to bringing China's intelligent underwater equipment to the world.

**Professional R&D team:** Designed for multiple international first-line brands, such as C \*\*\*\*\*, M \* \* \*, S \*\*\*\*\*, T \* \* \*, etc

**Flexible supply chain:** supporting full process services from concept development to mass production

**Modern management system:** self-developed OA system with full visibility, 100% transparency, and 15% faster response time for service.

**Intelligent manufacturing system:** equipped with 3D printed prototypes, laboratories, and CNC precision machining centers

**Complete production department:** equipped with mold department (6 CNC+5 EDM+...)... ) Injection molding department (30 with robotic injection molding machines), liquid silicone molding department (10 liquid silicone injection machines), liquid silicone molding department (10 liquid silicone injection machines), solid silicone molding department (10 solid silicone molding machines), screen printing and transfer printing department, assembly department (5 production lines), warehouse (2000 square meters for semi-finished and finished products).....

**Strict quality control standards:** Passed international certification systems such as ISO9001/CE/ROHS.

**Main products (OEM/ODM services)**

**Diving (snorkeling/free diving/deep diving):** Full face mask, diving goggles, breathing tube, fins and accessories.

**Swimming category (leisure/competition):** goggles, swim caps, hand fins, foot fins, and accessories.

**Global layout:** covering Europe, America, Asia, the Middle East and other regions.

**Cooperation Philosophy**

Tianhe Technology always adheres to innovation driven development, stimulates and guides customer needs through technological breakthroughs, creates value for customers, balances opportunities and risks with customers, responds quickly to customer needs, and promises to provide high-quality products, services, and solutions to every customer.

**Tianhe Technology adheres to the business principle of people-oriented and integrity-based, and wholeheartedly cooperates with domestic and foreign merchants for win-win results, common development, and co creation of the future.**

**Corporate motto:** Perseverance, Virtue Carrying Things

**Collaboration philosophy:** Shared mission, symbiotic value

# Brand Culture

DIVE·SWIM

## Aim Beyond

Swimming straight down, aiming to surpass - making every breakthrough a starting point for climbing new heights! May everyone have a positive and optimistic attitude towards work or life, just like a diver who never forgets their original intention, releases themselves, breaks through themselves, and surpasses themselves.

## Inspiration comes from every interaction with water

The smooth lines in the logo are not only an elegant moment for divers to delve deep into the blue and pursue tranquility, but also a moment of strength for swimmers to wave their arms forward and break through the water surface. We combine these two most beautiful postures into a unique brand imprint.

It tells a story about depth and progress, exploration and conquest. It represents the harmonious coexistence between humans and water, as well as the relentless pursuit of deeper and farther realms. It also symbolizes the brand's spirit of exploration towards diving straight and striving for transcendence.

# AIM BEYOND

# Stella Free diving fins

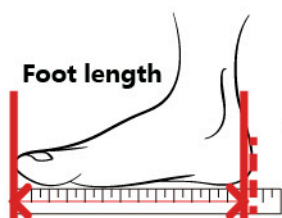

Easy to kick water without rubbing feet, strong thrust

Support personalized customization of one item

Stella (Free diving flippers) Foot cover size and weight					
Chinese size	US size	Bare foot length (mm)	Foot width (mm)	Foot height (mm)	Foot cover weight (1 pair)
35-36	5-5.5	216-226	88	65	680g
37-38	6-6.5	235-245	90	70	740g
39-40	7-7.5	243-253	98	73	840g
41-42	8-8.5	256-266	104	74	900g
43-44	9-9.5	260-270	108	75	940g

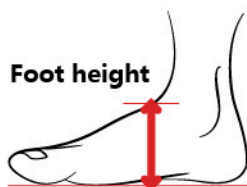

**Foot length**

**Barefoot length measurement**  
Measurement of the distance between the long toe and the heel (as shown in the figure by the two red lines)

**Foot width**

The width of your foot is the distance across the widest part of your sole

**Foot height**

Measurement of the distance from the sole to the back of the heel (heel height).

**The warm reminder:** The above calculation method is only suitable for normal foot types, excluding special cases. For thick feet or high heels, choose a larger size; for thin feet, choose a smaller size!

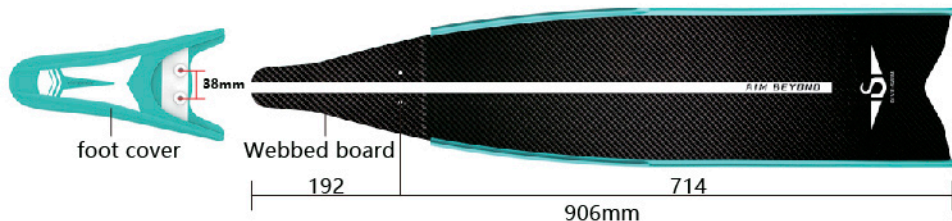

## Carbon fiber length measurement

Corresponding size number: length

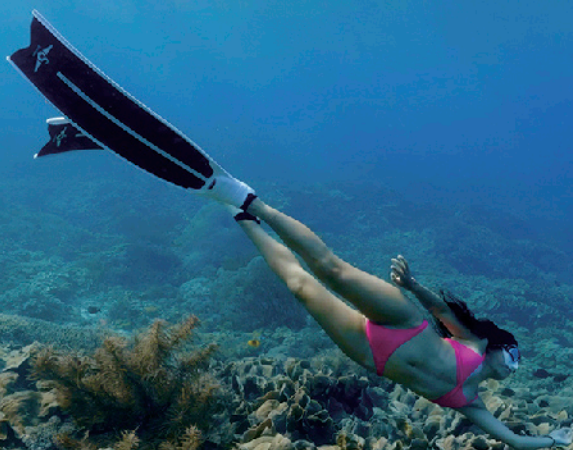

Saddle length 675

(35-36码) 930—960mm (43-44码)

## 91CM fins stand up to show leg length

Webbed anti scratch, no film,  
no weight gain, no color fading

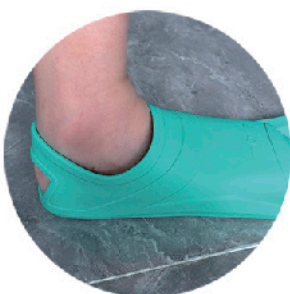

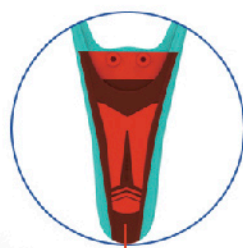

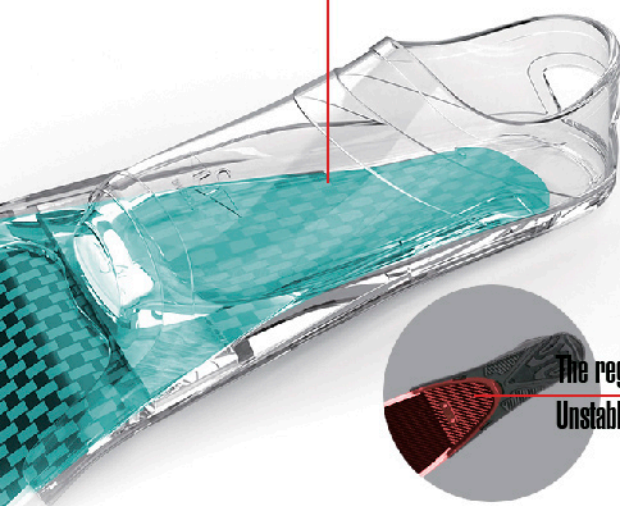

# Strong and stable transmission force

**Don't restrain your feet, don't press your instep**

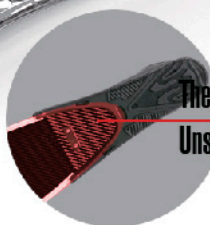

The hollow design at the heel is easy to put on and take off, and the foot cover is made of TPR material combined with the bottom PP material, Ensuring comfort while also possessing conductivity.

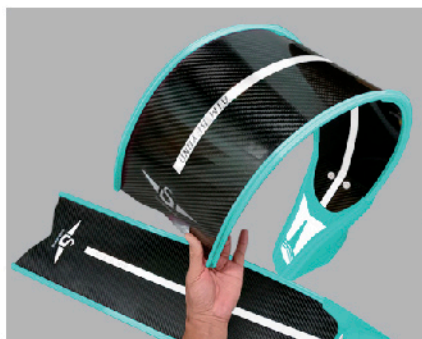

Stella footrest card slot length  
Strong thrust, smooth kicking of fins

hard glue

The regular foot cover card position is short  
Unstable flippers, raised feet, and abnormal noise

## High flexibility easy to curl and convenient to carry

High flexibility and resilience webbing, high resilience, safe curling and convenient storage for carrying.

# Custom Designs Requirements

Customized Graphics extra € 27 layout printing fee

Customized laser marking alone extra €52 labor fee (optional)

Custom Graphic design & Size Specifications:

The required print size for the flipper blade is 19.5 x 92 cm.

The required resolution for the artwork is 250 dpi.

The custom design can be provided in various file formats, such as PDF, AI, EPS, or PSD.

Production Timeline:

The estimated production time for a custom Stella flipper is 10-15 days.

This timeline does not include the transportation and delivery time.

Please note that in the case of special circumstances, the production time may be extended.

## The Automatic Free-Diving Mask

### 15 Meter Free-Equalizing

- 1 Efficiency of ear pressure equalization
- 2 Mask's ultra-low internal volume 25ml.
- 3 High-quality, one-piece optical glass lenses
- 4 China's First Innovation
- 5 The professional and multi-scenario use

Inside Mask  
25ml volume

Efficiency  
Pressure equalization

Tempered Glass  
Lenses

3D face-conforming  
Design

Safe & Non-Toxic  
Material

CXC1 diving mask's comfortable and non-constrictive design can enhance diving efficiency by up to 50% and enable divers to capture more natural, relaxed, and confident-looking underwater.

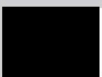

Pink & White

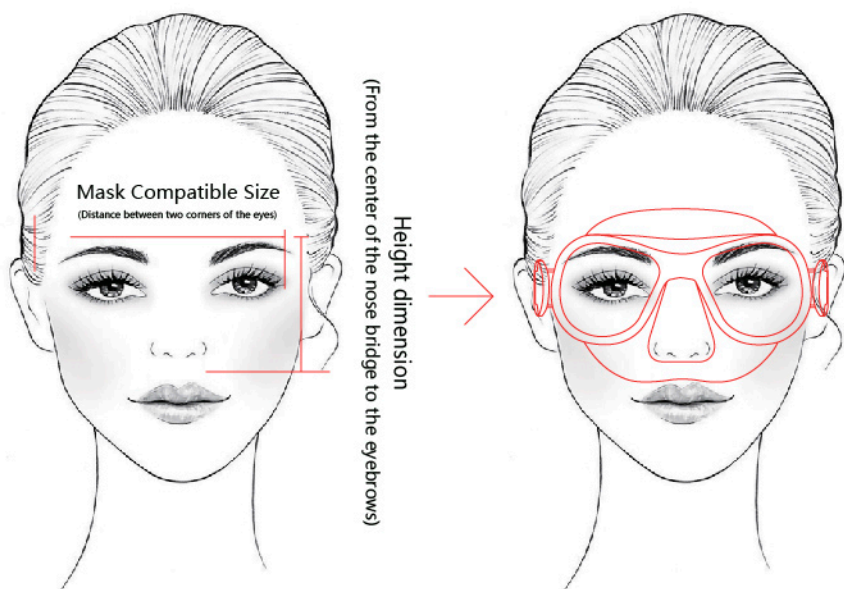

White

Black

## Reminder

### Facial Lens Matching Face Size Ranges

**For your better anti-leakage experience:**

- 1、The distance between the corners of our eyes can not be greater than 115MM (gab  $\pm$  5MM)
- 2、To wear the eyes centered lens.

### Anti-fogging:

This product is made of high-definition optical tempered glass, high-definition scratch-resistant, drop-resistant, so the lens has no anti-fog treatment.

Fogging is caused by temperature differences, here are a few tips for you to use for reference:

- 1、Spit to the lens.
- 2、Burn the lens with a lighter.
- 3、Spray anti-fog fluid.
- 4、Apply anti-fogging film.

### Mask tightness issue:

The CXC1 mask's innovative 25ml volume design, small cavity.

We advise you to wear a little tighter than the ordinary mask, but the head strap is longer than the ordinary mask strap, and can be adapted to the face shape to adjust to the best.

### Problems with mask leaks :

- 1、The use of BTV method of diving users, please adjust the mask head strap tighter.
- 2、Consideration for Users with Deeper Facial Lines: Divers with pronounced facial lines may have trouble getting a good fit with the CXC1 mask. They should test the fit carefully, as the silicone may not conform well. If it doesn't fit properly, these users may need to look for a different mask that better suits their facial structure.
